

This market will resolve to "Yes" if all of the following conditions are met between January 1 and December 31, 2026, 11:59 PM ET:

- Elon Musk trillionaire
- Another Elon baby
- 9+ SpaceX Starship launches reach space

Otherwise, this market will resolve to "No".

This market will remain open until it is confirmed that at least one of the above conditions has not been met, or until all of the above conditions have been met within the specified timeframe.

#### 1. Elon Musk trillionaire

This market will resolve to "No" if Elon Musk's net worth, as listed on the Bloomberg Billionaires Index, does not reach or exceed \$1 trillion at any point during this market's above-specified time frame.

The resolution source for this market will be the Bloomberg Billionaires Index (<https://www.bloomberg.com/billionaires/>); however, a consensus of credible reporting may also be used.

#### 2. Another Elon baby

This market will resolve to "No" if the existence of another Elon Musk child is not confirmed during this market's above-specified time frame.

Any child explicitly claimed by Elon Musk or confirmed to be his child by a consensus of credible reporting will qualify.

Qualifying announcements of a pregnancy will count.

The resolution source for this market will be information from Elon Musk and a consensus of credible reporting.

#### 3. 9+ SpaceX Starship launches reach space

This market will resolve to "No" if the number of SpaceX Starship launches successfully reaching an altitude of 62 miles above sea level is below 9 during this market's above-specified time frame.

A successful launch is defined as the Starship taking off from its launchpad and reaching a minimum altitude of 62 miles above sea level. Any subsequent anomaly (e.g., an explosion) after the vehicle reaches 62 miles will have no bearing on the outcome.

The primary resolution source for this market will be SpaceX's official video feed of the launches (e.g., via SpaceX YouTube Channel), as well as secondary video feeds or written reports if necessary. However, a consensus of credible reporting may also be used.
